Biosynthesis and Degradation

Ribonucleic acid synthesis *in vitro* in primary spermatocytes isolated from rat testis.
By J. A. Grootegoed, A. H. Grollé-Hey, F. F. G. Rommerts & H. J. van der Molen 23

Regulation of mammalian protein synthesis *in vivo*. Stimulated liver ribonucleic acid synthesis *in vivo* after cycloheximide treatment.
By J. J. Ch'ih, L. M. Pike & T. M. Devlin 57

The mode of action of 4-methylumbelliferyl β-D-xyloside on the synthesis of chondroitin sulphate in embryonic-chicken sternum.
By K. D. Gibson & B. J. Segen 65

Biosynthesis and release of glycoproteins by human skin fibroblasts in culture.
By C. H. J. Sear, M. E. Grant & D. S. Jackson 91

Bioenergetics

2-Deoxy-D-galactose, a substrate for the galactose-transport system of *Escherichia coli*.
By P. J. F. Henderson & R. A. Giddens 15

The effects of ionophores on the fluorescence of the cation 3,3′-dipropyloxadicarbocyanine in the presence of pigeon erythrocytes, erythrocyte 'ghosts' or liposomes.
By G. A. Kimmich, R. D. Philo & A. A. Eddy 81

The cytochromes of *Acanthamoeba castellanii*.
By S. W. Edwards, A. H. Chagla, A. J. Griffiths and D. Lloyd 113

PAGE

Subcellular Structures

Differences in size, structure and function of free and membrane-bound polyribosomes of rat liver. Evidence for a single class of membrane-bound polyribosomes.
By J. C. Ramsey & W. J. Steele 1

Cellular Interactions and Control Processes

Hormonal control of gluconeogenesis in tubule fragments from renal cortex of fed rats. Effects of α-adrenergic stimuli, glucagon, theophylline and papaverine.
By D. W. R. MacDonald & E. D. Saggerson 33

Effect of lutropin on phosphorylation of endogenous proteins in testis Leydig cells. Correlation with testosterone production.
By B. A. Cooke, M. L. Lindh & F. H. A. Janszen 43

Ornithine decarboxylase and polyamines in liver and kidneys of rats on cyclical regimen of protein-free and protein-containing diets. Relationship to deoxyribonucleic acid synthesis in liver.
By D. C. Farwell, J. B. Miguez & E. J. Herbst 49

Accelerated hepatic haem catabolism in the selenium-deficient rat.
By R. F. Burk & M. A. Correia 105

Metabolism in Whole Organisms

Use of octadecasilyl-silica for the extraction and purification of peptides in biological samples. Application to the identification of circulating metabolites of corticotropin-(1–24)-tetracosapeptide and somatostatin *in vivo*.
By H. P. J. Bennett, A. M. Hudson, C. McMartin & G. E. Purdon 9

RAPID PAPERS

PAGE

Bioenergetics

Energy-dependent uptake of arsenite by rat liver mitochondria.
By E. J. Harris & F. M. Achenjang 129

PAGE

Cellular Interactions and Control Processes

Stimulation of steroid glucuronidation by uridine diphosphate *N*-acetylglucosamine and by microsomal disruption.
By J. Wilkinson & T. Hallinan 125

Contents of Volume 168, No. 2

FULL PAPERS

PAGE

Biosynthesis and Degradation

Iodinated phospholipids and the iodination of proteins of dog thyroid gland *in vitro*.
By J. L. Rabinowitz & C. J. Tavares 155

Effect of microtubular or translational inhibitors on general cell protein degradation. Evidence for a dual catabolic pathway.
By J. S. Amenta, M. J. Sargus & F. M. Baccino 223

Fatty acid biosynthesis by a particulate preparation from germinating pea.
By P. Bolton & J. L. Harwood 261

Bioenergetics

Relationship between the reduction of oxygen, artificial acceptors and cytochrome *P*-450 by NADPH–cytochrome *c* reductase.
By V. Lyakhovich, V. Mishin & A. Pokrovsky 133

The respiratory chain of a newly isolated *Methylomonas* PII.
By A. K. Drabikowska 171

Transport of adenine, hypoxanthine and uracil into *Escherichia coli*.
By K. Burton 195

Midpoint redox potentials of plant and algal ferredoxins.
By R. Cammack, K. K. Rao, C. P. Bargeron, K. G. Hutson, P. W. Andrew & L. J. Rogers 205

Evidence for an electrogenic 3-deoxy-2-oxo-D-gluconate–proton co-transport driven by the protonmotive force in *Escherichia coli* K12.
By A. Lagarde 211

The phosphorylation potential generated by respiring bovine heart submitochondrial particles.
By S. J. Ferguson & M. C. Sorgato 299

Subcellular Structures

Rapid isolation of plasma membranes in high yield from cultured fibroblasts.
By D. Thom, A. J. Powell, C. W. Lloyd & D. A. Rees 187

PAGE

Skeletal-muscle sarcolemma from normal and dystrophic mice. Isolation, characterization and lipid composition.
By T. A. de Kretser & B. G. Livett 229

Mitochondrial and cytoplasmic ribosomes from mammalian tissues. Further characterization of ribosomal subunits and validity of buoyant-density methods for determination of the chemical composition and partial specific volume of ribonucleoprotein particles.
By A. Sacchi, U. Ferrini, P. Londei, P. Cammarano & N. Maraldi 245

Passive ion permeability of the chromaffin-granule membrane.
By J. H. Phillips 289

Cellular Interactions and Control Processes

Immunological evaluation of repeated administration of erythrocyte-entrapped protein to C3H/HeJ mice.
By M. B. Fiddler, L. D. S. Hudson & R. J. Desnick 141

The effect of chronic diabetes, induced by streptozotocin, on the activities of some enzymes of glycerolipid synthesis in rat liver.
By P. H. Whiting, M. Bowley, R. G. Sturton, P. H. Pritchard, D. N. Brindley & J. N. Hawthorne 147

Inhibition of glucose uptake and glycogenolysis by availability of oleate in well-oxygenated perfused skeletal muscle.
By M. J. Rennie & J. O. Holloszy 161

S-Adenosylmethionine metabolism and its relation to polyamine synthesis in rat liver. Effect of nutritional state, adrenal function, some drugs and partial hepatectomy.
By T. O. Eloranta & A. M. Raina 179

The pinocytosis of ^{125}I-labelled poly(vinylpyrrolidone), [^{14}C]sucrose and colloidal [^{198}Au]-gold by rat yolk sac cultured *in vitro*.
By A. V. S. Roberts, K. E. Williams & J. B. Lloyd 239

PAGE

Modulation of the response of bovine adrenocortical adenylate cyclase to corticotropin.
By P. Glynn, D. M. F. Cooper & D. Schulster 277

The inhibition of lipid autoxidation by human caeruloplasmin.
By D. J. Al-Timimi & T. L. Dormandy 283

PAGE

Enhancement of the anti-anabolic response to adenosine 3′:5′-cyclic monophosphate during development. The inhibition of hepatic protein synthesis.
By A. Klaipongpan, D. P. Bloxham & M. Akhtar 271

RAPID PAPERS

PAGE

Cellular Interactions and Control Processes

Phosphorylation of the inhibitory subunit of troponin in perfused hearts of mice deficient in phosphorylase kinase. Evidence for the phosphorylation of troponin by adenosine 3′:5′-phosphate-dependent protein kinase *in vivo*.
By P. J. England 307

Incorporation of D-glucose-, L-alanine- and phosphate-transport systems from rat renal brush-border membranes into liposomes.
By R. Kinne & R. G. Faust 311

PAGE

A comparison of the effects of prednisolone and methylprednisolone on human lymphoblastoid cells.
By A. W. Waddell & A. R. Currie 323

Development

Protein phosphorylation in normal and neoplastic development. Cyclic AMP-dependent protein kinase activity in urethane-induced pulmonary tumours.
By A. M. Malkinson, T. J. Gunderson & C. E. McSwigan 319

Metabolism in Whole Organisms

α-Pinene metabolism by *Pseudomonas putida*.
By N. J. Tudroszen, D. P. Kelly & N. F. Millis 315

Contents of Volume 168, No. 3

FULL PAPERS

PAGE

Biosynthesis and Degradation

Role of a specific choline pool in sphingomyelin synthesis in rat heart.
By Z. Kiss 387

Effects of analogues of ethanolamine and choline on phospholipid metabolism in rat hepatocytes.
By B. Åkesson 401

Evidence for a high proportion of inactive ribosomes in slow-growing yeast cells.
By C. Waldron, R. Jund & F. Lacroute 409

The role of nucleoside diphosphatase in a uridine nucleotide cycle associated with lactose synthesis in rat mammary-gland Golgi apparatus.
By N. J. Kuhn & A. White 423

The mechanism of C-20 hydroxylation of α-ecdysone in the desert locust, *Schistocerca gregaria*.
By P. Johnson & H. H. Rees 513

PAGE

The pathway of glutamate metabolism in rat brain mitchondria.
By S. C. Dennis & J. B. Clark 521

Occurrence of 3-hydroxyretinol in the freshwater fish *Bagarius bagarius* and *Wallago attu*. Isolation and synthesis.
By A. B. Barua, R. C. Das & K. Verma 557

Bioenergetics

Oxidative phosphorylation. Halide-dependent and halide-independent effects of triorganotin and triorganolead compounds on mitochondrial functions.
By W. N. Aldridge, B. W. Street & D. N. Skilleter 353

The uptake and release of calcium by heart mitochondria.
By E. J. Harris 447

PAGE

Subcellular Structures

The biosynthesis of brain gangliosides. Separation of membranes with different ratios of ganglioside-sialylating activity to gangliosides.
By C. A. Landa, H. J. F. Maccioni, A. Arce & R. Caputto 325

Preparation of hepatic gap (communicating) junctions. Identification of the constituent polypeptide subunits.
By J. G. Culvenor & W. H. Evans 475

Amino acid transport in brush-border-membrane vesicles isolated from human small intestine.
By H. Lücke, W. Haase & H. Murer 529

Cellular Interactions and Control Processes

Modifications of major aspects of myocardial ribonucleic acid metabolism as a response to noradrenaline. Behaviour of polyadenylate polymerase and ribonucleic acid polymerase, acetylation of histones and rate of synthesis of polyamines.
By A. Casti, A. Corti, N. Reali, G. Mezzetti, G. Orlandini & C. M. Caldarera 333

Modifications of major aspects of myocardial ribonucleic acid metabolism as a response to noradrenaline. Action of the hormone on cytoplasmic processing of ribonucleic acid after reserpine treatment.
By A. Corti, A. Casti, G. Mezzetti, N. Reali, G. Orlandini & C. M. Caldarera 341

Effects of hormones on the synthesis of α_1 (acute-phase) glycoprotein in isolated rat hepatocytes.
By K. N. Jeejeebhoy, J. Ho, R. Mehra, J. Jeejeebhoy & A. Bruce-Robertson 347

A quantitative study of pinocytosis and intracellular proteolysis in rat peritoneal macrophages.
By M. K. Pratten, K. E. Williams & J. B. Lloyd 365

Regulation of L-ornithine decarboxylase and *S*-adenosyl-L-methionine decarboxylase in rat ventral prostate and seminal vesicle.
By K. Piik, P. Rajamäki, S. K. Guha & J. Jänne 379

Porphyrins and porphyrinogen carboxy-lyase in hexachlorobenzene-induced porphyria.
By L. C. San Martín de Viale, M. del C. Ríos de Molina, R. Wainstok de Calmanovici & J. M. Tomio 393

PAGE

Loss of haem from cytochrome *P*-450 caused by lipid peroxidation and 2-allyl-2-isopropylacetamide. An abnormal pathway not involving production of carbon monoxide.
By F. De Matteis, A. H. Gibbs & A. Unseld 417

Demonstration of the phosphorylation of acetyl-coenzyme A carboxylase within intact rat epididymal fat-cells.
By R. W. Brownsey, W. A. Hughes, R. M. Denton & R. J. Mayer 441

Activity of covalently cross-linked cholera toxin with the adenylate cyclase of intact and lysed pigeon erythrocytes.
By S. van Heyningen 457

Control of glucose metabolism in isolated acini of the lactating mammary gland in the rat. The ability of glycerol to mimic some of the effects of insulin.
By A. M. Robinson & D. H. Williamson 465

Binding, interiorization and degradation of cholesterol ester-labelled chylomicron-remnant particles by rat hepatocyte monolayers.
By C.-H. Florén & Å. Nilsson 483

Tryptophan and the control of plasma concentrations in the rat.
By S. A. Smith & C. I. Pogson 495

Regulation of onset of development of UDP-glucuronosyltransferase activity towards *o*-aminophenol by glucocorticoids in late-foetal rat liver *in utero*.
By G. J. Wishart & G. J. Dutton 507

Phosphorylation of pig brain microtubule proteins. General properties and partial characterization of endogenous substrate and cyclic AMP-dependent protein kinase.
By P. Sheterline 533

The effect of streptozotocin-induced diabetes and of insulin supplementation on glycogen metabolism in rat liver.
By R. L. Khandelwal, S. M. Zinman & E. J. Zebrowski 541

A study of the kinetics of the muscarinic effect on phosphatidylinositol and phosphatidic acid metabolism in rat brain synaptosomes.
By J. C. Miller 549

Metabolism in Whole Organisms

Biliary excretion of some anionic derivatives of diethylstilboestrol and phenolphthalein in the guinea pig.
By P. A. Barford, A. H. Olavesen, C. G. Curtis & G. M. Powell 373

Clearance of human *N*-acetyl-β-hexosaminidases from rat circulation.
By T. Bearpark & J. L. Stirling 435

RAPID PAPERS

PAGE

Biosynthesis and Degradation

Stability of rat skin collagen during recovery from under-nutrition.
By D. J. Etherington 579

Affinity chromatography of thiol-containing purines and ribonucleic acid.
By W. T. Melvin & H. M. Keir 595

Lysosomes and membrane recycling. A hypothesis.
By R. T. Dean 603

Subcellular Structures

Transmembrane migration ('flip-flop') of cholesterol in erythrocyte membranes.
By C. J. Kirby & C. Green 575

Cellular Interactions and Control Processes

Carbonic anhydrase activity in mammalian skeletal and cardiac muscle.
By J. B. Moynihan 567

PAGE

Phospholipid requirement for 2-acetamidofluorene *N*- and ring-hydroxylation by hamster liver microsomal cytochrome *P*-450 enzyme system.
By P. D. Lotlikar, E. N. Dwyer, W. J. Baldy, Jr. & J. Nyce 571

Effect of removal of calcium-activated adenosine triphosphatase from rat mast cells by treatment with sodium glycocholate.
By P. H. Cooper & D. R. Stanworth 583

Effect of Methylene Blue on glutamate and reduced glutathione of rabbit erythrocytes.
By J. E. Smith, E. Mahaffey & M. Lee 587

A species difference in nucleoside phosphorylase activity and inosine-stimulated insulin secretion in isolated islets of Langerhans.
By I. L. Campbell & K. W. Taylor 591

Development

Cardiac-muscle hypertrophy. Differentiation and growth of the heart cell during development.
By W. C. Claycomb 599
